

Please reject the NAB's petition 04-610 and allow satellite radio to continue to provide diversification of what I can hear on radio. Don't stop there. Do not allow any further domination of radio ownership by huge corporations. The FCC has forfeited my right to competition on the public airwaves by allowing multi-ownership to prosper without regulation. Don't further give them the right to control what is being broadcast. I am told that Clear Channel Communications already owns 10% of XM Satellite Radio. They should be required to divest themselves of that ownership now, not continue to dominate. Thank you for your attention to my comments.
